CSS

Fun for no one pt.2

By Stephen Lampa & Jesse Williamson

CSS

Once upon a time...

- **CSS Intro**

Layout

In the beginning...

CSS Layout

Float

Display

Display

- Block
- Inline
- Inline-block
- Table (NO!)
- Flex

Flexbox

Flexbox

The key feature of Flexbox is the fact that items in a flex layout can grow and shrink. Space can be assigned to the items themselves, or distributed between or around the items.

- Mozilla Developer Network

Flexbox

- display
- flex-direction
- justify-content
- align-items

Selector Redux

Challenge:

Make your 'About Me' look modern.
